We have recently become aware of a potential issue with the following mouthwash products. We have identified that in some instances, the preservative in the products may not operate as it should which may allow microbes to grow and contaminate the product. Although we believe the likelihood is small, this may present a risk to users of the product with a suppressed immune system. As a precautionary measure we are therefore advising customers that may have purchased products with these barcodes to stop using the product immediately and return the product to store for a full refund.

Nothing matters more to us than our customers' safety – so if you've purchased any of these products from us, please return them to any of our stores for a full refund of the purchase price.

Please note that this recall only applies to the products described above.
